

Reliability Since 1939

SIOUX Corporation purchased and now manufactures the Walters *SafeSteam*™ fireless steam cleaner line. Now you can save money using your plant's internal steam for cleaning purposes. Avoid using combustible fuels and eliminate exhaust venting with an inexpensive, bulletproof steam cleaner that taps into your in-plant steam lines.

HOW TO USE YOUR PLANT'S INTERNAL STEAM FOR CLEANING PURPOSES

If your plant is plumbed with 80-150psi steam lines, here's an innovative way to use that steam for cleaning purposes. We've developed a steam cleaner that has many benefits over conventional steam cleaners because it taps into your existing steam lines, so it doesn't need its own burner.

SafeSteam™ Saves You Money And Time.

SafeSteam is always instantly ready. Operators just turn on the switch, pick up the gun and go to work. SafeSteam is easy for your internal maintenance team to maintain. No dealer or costly service contracts are required. Not only is it easy to hook up and operate, it's inexpensive to buy. Because of its simple, streamlined design, and with no fuel supply or venting required, the installed cost is at least \$1,000 less than other alternatives.

SafeSteam™ Means No Fire, No Vents, No Stacks, And No Fuel Tanks To Fill.

The Walter's *SafeSteam*™ Cleaner transforms your plant steam (which by itself is too dry to be effective for steam cleaning) by scientifically blending proper amounts of water. It

uses a specially designed electric motor driven pump, industrial cleaning agents and our proprietary *SteamSho!*™ SteamGun to generate a readily available source of steam for your cleaning and sterilization applications. Since no burner is required, you avoid messy and dangerous fuels. There is no exhaust to worry about, so you can use it indoors without special venting or air contamination.

SafeSteam™ Has A Thousand Applications.

Use your SafeSteam Cleaner for paint preparation, sterilizing, cleaning of delicate equipment and sensitive parts, cutting through heavy grease...in fact, just about anywhere inside or outside your facility where you need the power of steam to handle tough cleaning jobs and want to avoid pressure washer mess and splash-back.

SIOUX/WALTERS SAFESTEAM™ STEAM SPECIFICATIONS

- 2.8 GPM @ 150 PSI, 325°F steam
- General brand industrial grade triplex plunger pump, belt driven
- 3/4 HP, TEFC, 1750 RPM water pump motor
- 115V/1Ph/60Hz, operating current 11 amps
- Walters Trigger type SteamGun
- 1/2 inch x 50 foot steam hose
- Round Steam nozzle with orifice
- Chemical metering device and 16 1/2 gallon stainless steel chemical storage tank
- Includes flow switch and automatic starting and stopping of water pump automatically activated from steam gun opening and closing

- Temperature gauge and pressure relief valve
- Stationary mounted on heavy duty steel legs
- Optional hose wall mounted hose reel, additional hose, and fittings are available, please consult factory.

- Steam line requirements: approximately 300 lb/hr of steam @80-150 PSI
- Water supply requirement: 2.2 GPM cold water @ 15 to 100 PSI
- Dimensions: 38"L x 25.5"W x 25" H
- Net Weight: 260 lbs.
- Approximately Shipping Weight: 285 lbs.

Sioux is the industry leader in designing industrial steam cleaning equipment.
